TO KEEP IN ANY CLIMATE

THESE Pills are prepared expressly to
operate in harmony with the
pure purifiers, *Bristol's* *Saragatilla*,
in cases arising from depraved humors or
corrupt blood. Under the influence

two *Great Remedies*, maladies, that have been heretofore considered incurable, can now be cured quickly and permanently. In the following diseases these Pills are the swiftest and the best Remedy ever prepared, and should be at once resorted to in

**DYSPEPSIA, OR INDIGESTION,
LIVER COMPLAINT,
CONSTIPATION,
HEADACHE,
RHEUM.**

For many years these Pills have been in daily practice, always with the best results, and it is with the greatest confidence they are recommended to the afflicted. They are composed of the most costly, purest, and best vegetable Extracts and Balsams, as are but seldom used in ordinary medicines, on account of their great cost, and combination of rare medical properties, such that in long standing and difficult cases, where other remedies have failed, they have been found to be successful.

ONLY 25 CENTS PER PHIAL.

For sale by all Druggists. J. F. Hodge Co., 303 St. Paul street, Montreal, Gen. Agents for Canada. Sold in Belleville by Hodge & Co., M. Sawyer & Co., & C. L. Linder, and at Apothecaries' Hall.

OUTLINES FOR ESTABLISHING
CHEESE & BUTTER PA

It is not considered profitable these factory when the milk is sold in the city. The help of the Government in the form of an expense account would be a small factory as for the milk of 500 cows. For a small factory, a building 25 meters long and two stories high is needed—the lower story to be for manufacturing department and the upper story, the dry house for the milk. Alph & Co. of Uster have given a plan for the factory, good purpose for cheese making to fitted up at least than had to be an apparatus. It better was to be done with cheese, as should be done with cheese, as with milk even in the time of 1917 by 12 feet 2

ing) so as to be filled with water by spring 1967. The temperature of the water will be 68°. Long ice pails, 20 inches in diameter, have variable space to receive the milk. The ice pails are immediately plunged into the milk in the pail above near the flow of water. Adjacent to each, and running back, would be created a churn—ice-churns. Each churn is 80 feet, and leading out to one side of which is the ice-broad alley may be constructed. In each case or place for cream and cream to run down connection with the ice-house by ways kept cool.
